

# CELIA MALAEB

Biology and Physics Teacher

## PROFILE

I believe if students are nurtured properly and with great care, they can lead the country in different fronts and bring laurels to the nation. My objective as a teacher is to motivate my students, to enlarge their own learning interests and critical thinking – to establish a learner-centered environment in the classroom. In return, I look forward to cooperate in a collaborative learning environment, where I can develop my skills and teaching techniques.
