To whom it may concern,

I am Souad Ammash, a 24 years old Lebanese mom that seeks challenges and continuous education.

In 2019, I took my master's degrees in pure physics (Condensed Matter theory) from the Lebanese University.

I started working in Sultan Salah El-Deen School year 2019-2020 as a high school physics teacher. During that year, I taught physics from grade 9 to grade 12 where I enjoyed my work a lot. Moreover, I get more familiar with teaching students aboard due to COVID-19 pandemic.

My happiness is fulfilled when the students are waiting my session to attend, enjoying a tough material as physics and understanding its concept. Teaching physics in the most modern and clearest way to the next generation is one of my goals in life.

I believe in the saying "Don't judge a book by its cover". I welcome the opportunity to discuss with you personally how my skills and strengths can best serve your school.

Thank you in advance for your time and consideration.

Sincerely,

Souad R. Ammash
